### GOINGS ON

Not much news. Information submitted to Newsletter Editor has been slim and none. Please send any information that might be of interest to the general membership. We need it for the next issue. Don't worry about your literary style, I will manage to make it look bad.

### COMMITTEE REPORTS

#### International Committee

There is little voluntary input from committee members. International travel is subject to severe restrictions from budget committees. Meetings are being held but participation levels are low unless the meeting is in committee members work area.

The 6th International Symposium on Aquatic Weeds (E.W.R.S.) will be held between September 20 and 25, 1982. The meeting will be a joint meeting with the 2nd International Conference on Herbivorous Fish.

Other activities are associated with ways and means to fund international seminars and weed science training throughout the under-developed world. The International Weed Science Society is searching for supporters of symposiums on rice and no-till.

A meeting to be held in Christ Church College, Oxford, England on April 7 and 8, 1981 deals with many aspects of aquatic weed control. T. O. Robson (he was at the Chattanooga A.P.M.S. meeting) is coordinator for both meetings for weed control subject matter in general.

#### Local Arrangements — Don V. Lee

Ex-President Lee has been busy. Things planned for the ladies are: a tea, a visit to the Governor's mansion, a trip to the Vicksburg battleground and other points of interest. We are assured the ladies will have fun and will still have plenty of free time.

#### Exhibits — Johnny Frizzell

A varied group of commercial and private applicators is taking shape. Several chemical and equipment companies will have their usual exhibits with the latest in new equipment and products. It looks like we will have a good all-around display from all sectors in the industry.

#### S.O.S. — Roy Clark

Roy recently sent word that the papers from industry, government, private and student areas have not been coming. I urge all of you to get moving and submit your Titles and Abstracts to him as soon as possible. Roy has lost considerable weight ("sweating this out") so let's help him out and flood him with papers. He can't stand to lose too much. If he does, he will be the smallest President in the history of the A.P.M.S. The Newsletter Editor is sending his, so let's get them going. Use the second call for papers form. The deadline is April 15, so hurry up. Submit your papers NOW and if you are interested in a future Committee Assignment, please let him know. You too can get to be a V.I.P.

Student papers should be addressed to Dr. Dean F. Martin as stipulated on the call for papers.

## Free-Bee Backfires

Publication, Aquatic Plant Control by L. V. Guerra, banned in 27 states, recalled, due to publication errors. New revised copy will be available soon and sent to those who have requested it, sent back their original copies and are on good terms with Lou Guerra. Revisions have been proof-read by Texas Department of Agriculture and the E.P.A. MORAL OF THIS: "Don't recommend products, no matter how good they are, if they are not registered for aquatic use".
